

Worktops with Antibacterial Surface Protection

that eliminates 99.9% of bacteria

Did you know that 80% of bacteria are transmitted by contact between hands and contaminated surfaces?

Every Bushboard laminate and compact worksurface now has built-in anti-bacterial protection as standard, which eliminates 99.9% of bacteria within 24 hours and prevents the build up of mould and mildew.

Our group-developed bacteria-destroying resin is part of the surface composition added during production, not a coating, giving each surface a guaranteed lifetime protection against bacteria.

Bushboard Anti-bacterial technology makes Bushboard surfaces:

- Hygienic
- Suitable for food contact
- Easy to clean
- Anti-mould and fungus
- Suitable for residential and commercial areas
- Rotproof

The ISEGA research and testing institute certifies that Bushboard Anti-microbial surface technology protects against:

- MRSA
- E-coli
- Salmonella
- Listeria monocytogenes
- Klebsiella pneumoniae
- Pseudomonas aeruginosa
